-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. This in response to the applicant's communication filed 9/11/07.

Claim Objections

2. Claim 4 is objected to because of the following informalities: "MCC" should spell out. Appropriate correction is required.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-6 and 10-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Barron et al, US Pub. No. 2004/0210531.

Borron et al a system and method for single event authorization control of transactions comprising: financial institutions and businesses for establishing accounts for employees that have an authorization process that augments the normal authorization process, wherein this augmented authorization process can approve transactions that otherwise exceed the transaction limitations established for the accounts; a single event authorization control (SEAC) process is completed in response to determining that a financial services transaction undergoing a conventional authorization process qualifies for the SEAC process, the SEAC data record contains parameter values that most closely match the parameter values associated with the

authorization request is selected and the applicable SEAC action contained in the data record (e.g., decline override, funds encumbrance, or budgetary exception) is performed; after completing/creating the SEAC data record, a decision regarding authorization of the transaction is generated (see paragraph 0030+).

Borron et al disclose that keyboard is provided for entering information for creating the SEAC record data, but fail to explicitly teach that the SEAC is a manual authorization. However, the SEAC is functionally equivalent as the claimed manual authorization.

It would have been obvious for a person of ordinary skill in the art at the time the invention was made to modify the teachings of Barron et al to include means for generating manual authorization for authorizing transactions exceeding the predetermined transaction's limits. Such modification would make the system more versatile by providing alternate means for authorizing transactions. Furthermore, the claimed manual authorization fails to provide any unexpected results. therefore, it would have been an obvious extension as taught by Borron et al.

Response to Arguments

5. Applicant's arguments with respect to claims 1-6 and 10-14 have been considered but are moot in view of the new ground(s) of rejection.

Examiner's Notes:

6. Examiner has cited particular columns and line numbers in the references as applied to the claims above for the convenience of the applicant. Although the specified citations are representative of the teachings of the art and are applied to the specific limitations within the individual claim, other passages and figures may apply as well. It is respectfully requested from

the applicant in preparing responses, to fully consider the references in entirety as potentially teaching all or part of the claimed invention, as well as the context of the passage as taught by the prior art or disclosed by the examiner.

Conclusion

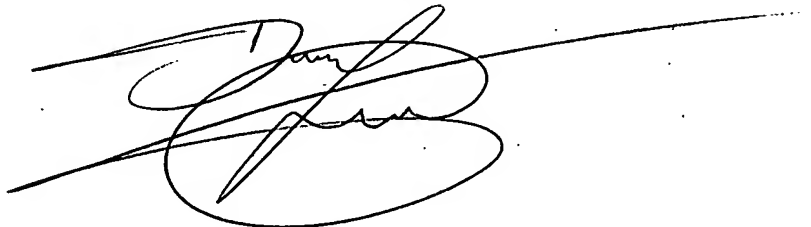

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Daniel St.Cyr whose telephone number is 571-272-2407. The examiner can normally be reached on Mon-Fri.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael G. Lee can be reached on 571-272-2398. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
